EDUCATION

Olin College of Engineering, B.S. Robotics Engineering/Computer Science

May 2028*

- Relevant coursework: Linear Algebra, Modeling & Simulation, Mechanical Design

Worcester Polytechnic Institute via Massachusetts Academy of Math and Science

2022 - 2024

- *Dual-enrolled during my senior year of high school as a full-time freshman at WPI.*
- GPA: 4.0/4.0. Relevant coursework: Intro to Robotics Engineering, Assembly Language, Intro to Electrical Engineering.

SKILLS

- **Programming:** C++, C, Java, Python, MATLAB. Git & GitHub, Linux, MySQL & Firebase. Arduino & Raspberry Pi.
- **Mechanical:** SolidWorks, FEA, Fusion360 CAM, OnShape, HAAS Mill, CNC Router, Formlab printers, machine shop tools.
- **Mathematics:** Mathematical modeling, statistics.
- **Languages:** Spanish (Advanced Proficient), Arabic (Proficient), English (native).

EXPERIENCE

Software Testing Intern | Evolv Technology

Jun 2024 - Aug 2024

- Developed randomized traffic flow testing module using Python/PyTest for 4K+ weapon detection scanners worldwide
- Designed system architecture and deployed testing module onto BeagleBone devices hosting APIs (Flask) for testing scanners
- Integrated testing devices with Evolv's CI/CD pipeline (Git, BitBucket, Jira, CircleCI) which runs on a daily basis
- Coordinated with 5+ engineers to document and replicate testing hardware to be used across departments
- Tested 50+ hours of simulated traffic on physical scanners and exposed critical errors (memory leak/performance issues)

Co-President | FIRST Robotics Team 190

Aug 2022 - May 2024

- Designed 10+ robot components with SolidWorks, created CAM paths with Fusion360, machined parts on CNC mills/routers
- Led robotic development with 30+ students on the club team for the 2 consecutive years of FIRST Robotics competitions
- Coordinated manufacturing, designing, and software projects, winning the 1st place engineering award (Excellence Award)
- Grew robotics team by over 70% and sought donors for a multi-million-dollar FIRST robotics facility for the FRC 190 team

Suspension Team | Olin Baja (Off-Road Vehicle) Team

Aug 2024 - Current

- Led re-design of the vehicle footbox and coordinated with gas and break pedal engineers to optimize footbox space
- Utilized SolidWorks and FEA to design and optimize mounting brackets, arms, and interfaces between chassis and pedals

PROJECTS

Digital Sign in/out System (MAMS SISO) | C++, RFID, MySQL, Python

Oct 2022 - May 2024

- Worked on a 3-person team to create a digital sign-in/out system to replace an existing paper-based system
- Designed system architecture to interact with local hardware (Raspberry Pi), MySQL data storage, and NodeJS website
- Organized MySQL database schema to hold 1000+ unique student schedules that vary each school day and sync with calendar
- Programmed Raspberry Pi to decode proprietary HID RFID card bit format to interact with RFID readers and student ID cards
- Filed HECVAT forms and worked with WPI Information Security team to meet FERPA privacy and security standards.

Assistive Wheelchair-Mounted Frisbee Launcher | OnShape, Physics, CNC Tools

Feb 2023 - May 2023

- Led a team of 4 to design a wheelchair-mounted frisbee launcher to enable individuals with limited mobility play with their pets.
- Designed 5+ parts using OnShape, integrating a car window motor, spring, and gearbox to launch frisbee like a clay pigeon
- Programmed Arduino to control motor with relay and use device and manufactured parts with machine shop tools
- Modeled mechanical stress using physics to determine required strength of parts and optimal gear ratios

UMass Memorial Hospital Navigation App | Firestore, Flutter, Android Studio

Feb 2023 - May 2023

- Member of 3-person team to create a Flutter app enabling UMass patients to navigate 20+ buildings and multiple campuses.
- Developed document-based data schema with Firestore to store different levels of building locations
- Created mock dataset to test concurrently while hospital administrators gathered real data

AWARDS

- **High School Mathematical Contest in Modeling (HiMCM):** 1st place rank of 950+ global teams (Outstanding NCTM Award).
- **International Math Modeling Challenge:** #1 U.S. Team out of 216 (Regional Outstanding Award).
- **Division Champions at FIRST Robotics World Championship in Houston '24** (3/80 teams).

**I am a sophomore in credits due to my dual enrollment at WPI.*
